

# March Break Schedule

## Science on the Spot

Check out our Science on the Spot carts for even more fun!

### Fog Blaster – Level 0

Believe it or not, we can use a garbage can to knock over a tower of cups. You'll have to see for yourself!

### Paper Pilots, Flight Gallery – Level 2

Test your aircraft crafting skills at our paper airplane station! Try out a new design or show off your favourite glider on our airplane launcher.

### Eye Spy a Blind Spot, Health Gallery – Level 2

We all have them, but never see them: it's your blind spot! Discover the structure of your own eye and see how you measure up against other visitors.

### Illusion Confusion – Level 3

Our brains and our eyes don't always see things the same way. Explore some optical illusions and brain teasers that will confuse your senses.

### Spin Art- Children's Gallery, Level 3

Create your own masterpiece using gravity, centripetal force, and your own creativity.

## Immersive Dome Theatre Shows

### Live Star Show: Our Place in Space

Let us take you through the night sky and leave you with a sense of wonder about the cosmos and our place in space. This show is sure to be a hit with any aspiring astro-enthusiast. (6 years+)

### Live Star Show: Sky Stories

Experience the myths and legends of the stars and constellations. Sky Stories is region and time specific to what you see in the current night sky, so the stories will change with the seasons! (2 years+)

### Full Dome Film: One World, One Sky

Follow characters from Sesame Street as they take an imaginary trip to the Moon, where they discover how different it is from Earth. (2 years+)

### Full Dome Film: Mayan Archaeoastronomy

Explore six Mayan archaeological sites and uncover their connection to the Universe in this Full Dome Film. Mayan Archaeoastronomy: Observers of the Universe intertwines science and mythology, bringing viewers on a poetic journey of how the Maya viewed and understood the cosmos. (8 years+)

### Full Dome Film: The Sun, Our Living Star

The Sun has shone on our world for four and a half billion years. It is our nearest star and our planet's powerhouse, the source of the energy that drives our winds, weather and all life. Discover the secrets of our star and experience never-before-seen images of the Sun's violent surface. (10 years+)

*\*Tickets can be purchased at admissions*

## Live Science Show

### Ecstatic Electricity

Become part of the experiment as we reveal how electrostatic charges exist in and around us. The Van de Graaff Generator, flying pie plates, and bouncing cotton balls will make this a "hair-raising" experience!

### A Touch of Fire

Marvel as our trained staff perform a dazzling fire show. Experience this visual odyssey and discover the ingredients needed for fire through the fire triangle.

### The Big Chill

Explore the realm of extreme cold and what happens to things in sub-zero temperatures. Colder than the coldest place on earth, liquid nitrogen will be used to flash freeze a flower and surprise you with what a balloon can do.
